

Familiar Condo in Estoril - House 1

Estoril, Portugal

Kitchen, bathrooms, fireplace, exteriors... all with our signature.

For the kitchen the choice was **Yellow California** in the countertops and between-cupboard-walls. The same marble for the floor combined with **Thassos White** commercial quality in a chess layout. The large kitchen window illuminates this partition and highlights the golden tones of the Yellow California marble.

For the lavabo, something special and different: on the floor and a lozenge 10*5cm strip in the wall, the marble **Forest Brown**, with its own veining beautiful structure. On the walls up to 1,2m height and on the vanity top the marble **Crema Marfil**. The owners chose to plaster the rest of the walls and to decorate with some wall-chandelier for the perfect luminosity.

In the common bathroom, two shades of yellow are permanently in play: **Sunny Light** is the polished marble base, in large pieces covering the walls and in a complementary strip on the floor. **Indus Gold** contrasts with the top, central floor mat and memories in stone tablets: bathtub niche and shower walls.

For the main bathroom, suite, the cream marble **Galala** and **Red Travertine** in an elegant combination. Note the large top with 2 washbasins, where one of the important ideas received was carried out with excellence: to make it appear massive to the point of "folding in" in the area of ??the cabinets so that these, later seated back, show a top "whole block" type. In the shower area a shower tray in the same Red Travertine.

In the living room an imponent fireplace and, still, easily combinable with any kind of furniture decoration. Made in **Sunny Light**, brushed finishing, this fireplace uses the "45º edging technique" for a massive effect when, in reality, the whole piece is done with 2cm thick slab material. The hidden lamps illuminate the small wall recesses full of books and family photos.

Outside, **Lioz** marble in bush hammered finish. Discover more photographs in the other houses in the condominium.
