

Residence in Cascais

Cascais, Portugal

For this house located in the historic center of Cascais we provide 4 varieties of marble.

Bianco Perlino was used for the living room floor and all common areas in the house: pure comfort.

In the dining room, **Indian Green** joins Bianco Perlino for a checkered fabric that defines and enchants the space.

In the living room there is also a fireplace in **Tinos Green**: bottle green and white accents in a classic environment that combines marble, wood, gilded woodwork, tapestries and fabrics.

The bathrooms are all in **Thassos White**, a Dolomite marble, some of which are beautifully combined with terracotta tiles.

These stand out for their luminosity and lightness but above all for their suspended tops with details of polished fins staging a perfect setting.
