Familiar Condo in Estoril – House 2: Pavings and Fireplace

Estoril, Portugal

Get familiar with the paving and fireplace of the common areas of this extraordinary apartment.

The clarity of the marble **Rosa Aurora Light**, extra selection, is unique and unrepeatable. It was applied in all the pavement of the common areas of this project, polished finishing. The pieces were all supplied in cut-to-size dimentions, achieving measures near to 100*100cm in the living room.

The marble **Sienna**, of an 'old-pink' background and white veining, combines perfectly with the Rosa Aurora Light of the pavement, and was applied in several elements that appeal to the continuous remembrance of the visitors: a "central-diamond" in the pavement of the entrance hall, small decorative triangles demarcating the dining-room, and a frontal beautiful fireplace panel in the living-room.
