Familiar Condo in Estoril – House 2: Bathrooms

Estoril, Portugal

Get familiar with the 3 toilets of this extraordinary apartment.

For the restroom, the choice was for the marble **Rosa Perlino**. The paving and facing (until 1,2m height) were supplied in the brushed finishing, that results wonderfully in this material. At the edge of the 1,2m height, a polished border of 3cm*3cm caps the walling cut-to-size tiles.

The bathtub-toilet was entirely supplied in the marble **Fior di Pesco**: floor and walls. The matching of the veins and the natural beauty of this Italian material speak from themselves. The outcome is at sight!

In the shower-toilet two marbles are combined: **Rosa Aurora Light** and **Indian Green**. Being an interior division, the predominant material is the Rosa Aurora Light, with the green marble walling the shower area and being applied in the shower-tray, skirting and lavatory-top.
