

# Familiar Condo in Estoril - House 3: Hall, Kitchen and Fireplace

Estoril, Portugal

Get to know the classic choices of the entrance hall, kitchen and fireplace of this well-tasted apartment.

The marble **Golden Cream** paves the entrance hall and the kitchen in cut-to-size pieces of dimensions similar to 40\*40\*2cm. At the entrance area the fitting of the marble was planned to be made in a 45 degree angle, with a border of the same material closing the area.

Also the kitchen countertops are in the **Golden Cream** marble, here combined with manual terracotta ceramic of an intense blue-shade color.

The fireplace in **Lioz** marble with classic lines, was perfectly executed and finished with the expertise already known by our team. A game of bush hammered and honed finishes.
