Shades of Beige - Gorgeous Bathrooms in Estoril

Estoril, Portugal

For the bathrooms of this house, the client chose natural stones of similar tones but nuances and finishes that make them unique: **Beige Travertine**, the hard Portuguese limestone **Ataíja Cream** and the marble **Crema Marfil**.

Each space has a shower tray in the corresponding stone with the particularity of a "striped sandblasted" finish, which gives a touch of design to the non-slip functionality of the finish.
