Quinta do Castanheiro: Class and Beauty in Portuguese Limestones (Part II)

Colares, Portugal

This project bet on two Portuguese glazed limestones: **Ataíja Cream** and **Ataíja Blue** for practically all floors in the social area and for the bathrooms.

Let's highlight a detail of the guest bathroom where we manufactured three large pieces to be applied on the floor and wall in a "pattern carpet" way. These pieces were composed of small pieces assembled and glued manually one-by-one in our factory, in a 3-tone effect (**Blue Valley**, **Bateig Azul** and Ataíja Cream), 1 design feature, and some patience from our finishers (!)

The end result is sober, balanced and elegant.
